## Welcome to FlagSource

A Customer and Technology Focused Company

Wieelcome to FlagSource - A Customer and Technology Focused Company

Three years ago, the 4th generation of the Christiansen Family stepped up to take on the leadership of the company. As the new leadership team, we have shifted our focus to become a customer centric and technology driven organization. We believe this will make us a better partner for our customers.

Over the past 2 years, we have made significant capital investments to better serve the market,
 including new equipment that increases our capacity trifold. We have also upgraded our ERP system, built a new website and added additional color management software. This innovative technology will catapult FlagSource to become the premier large US Flag and Custom Flag manufacturer in the nation.

Equipment alone will not get us to the finish line. We have also invested in our team members to create a customer-focused culture. As the new owners, we are committed to making FlagSource the best partner in the industry. This means improving our service levels and customer service outreach. Our entire team is in lockstep with these goals and have pledged their commitment to these goals.

As we reflect on the last 3 years, it has been an incredible journey. We have accomplished a lot, but we have done it with heavy hearts. We lost our beloved CEO, Janice Christiansen, in March 2023 after a 28-month battle with glioblastoma. True to her legendary form, Janice was fearless in her battle and stayed close to the business until the very end. Her motto was, "The show must go on" so we will carry the business forward in her memory. Janice will be missed by her family, her FlagSource team and the many customers she connected with.

Looking to the future, the FlagSource team is committed to providing one of the best customer experiences possible. We are running 24 hours a day to ensure your order ships on time and we are excited to provide you with the highest quality products available!

Thank you for your business!

## What separates FlagSource from the rest?

- Construction begins with the finest fabrics and color-matched threads available.
- We embroider our own Starfields for all of our flags up to 20x38.
- We then carefully assemble each flag using a full $1 / 4^{\prime \prime}$ turn on all seams, a unidirectional chain stitch for all horizontal seams (it makes the flag stronger), and a lock stitch for all edge hems.
- Fly hems are finished with four rows of lock stitching and a 102 stitch X-box reinforcement at the top and bottom of flags up to $6^{\prime} \times 10$ '.
- Flags $8^{\prime} \times 12^{\prime}$ and larger feature an X-box at each horizontal seam
- Our industrial T60 thread will withstand 60 lbs . of force.
- For the strongest headings in the industry, we use a heavy duty nine ounce Poly Sateen.
- Flags $15 \times 25$ ' and larger are finished with our heavy duty webbing, which is 3 times the thickness of a seatbelt!
- Check out the hardware! Flags up to $6^{\prime} \times 10^{\prime}$ feature heavy duty brass grommets, and for flags $8^{\prime} \times 12^{\prime}$ and above, we provide heavy duty chrome D-rings for maximum flying strength.

## Colorado PolyExtra State Flag

## THE CENTENNIAL STATE

The Colorado flag was first adopted on June 5, 1911, to represent the US state of Colorado and revised on March 31, 1964. The red " $C$ " stands for the name of the state, Colorado, the word "centennial" referring to Colorado's accession to statehood in 1876, and "columbine" referring to the state flower. The gold circle represents sunshine and the gold mining industry in this state. The blue stripes represent the sky, and the white stripes represent both the peaks of the Rocky Mountains along with the mining industry and both colors together represent the state flower.
Our fully sewn 2 ply PolyExtra Colorado flags constructed with a nylon applique design are perfect for the winds found in this high wind state. Finished with heading and grommets.

## POLYEXTRA

## Armed Forces, Military \& Service Flags

## SUPPORT OUR TROOPS

Our military flags represent the branches of the United States Armed Forces along with several iconic and historical flags. In general, the order of precedence when displaying military flags together is the U.S. National Colors, U.S. Army, U.S. Marine Corps, U.S. Navy, U.S. Air Force, and U.S. Coast Guard. However, in any period, such as in wartime, where the U.S. Coast Guard is operating as part of the U.S. Navy, the U.S. Coast Guard flag would precede the U.S. Air Force flag.

Our Armed Forces flags and garden flags are printed on durable 200 Denier Nylon fabric using inks which are UV resistant and designed to last longer and wear better outdoors.

- Ordering Bag Signs is cost effective with a minimum order of 1,000 Signs, smaller quantities are available but corrugated plastic would probably be cheaper. Printed in up to four vibrant spot colors.
- Because of the way that Bag Signs are manufactured there may be over or under run which will result in an additional charge or refund of money. We will take every effort to avoid this, but please account for this in your budget as a possibility
- Bag Sign Orders take on an average of 8-10 business days to manufacture from the time you approve the art work until the time the signs leave our facility.
- Your order will ship via TRUCK LINE/UPS Combo. Your wires will ship via truck line because of the weight. Bag signs fit nicely into 500 pcs a box and will ship via UPS/FedEx ground.
- Nearest Pantone color matching available
- Halftones for bag signs will be evaluated on a per design basis and may require adding a "color" to the price.
- Turnaround time: 15 business days

## Progress Pride Flags

## DIGITAL NYLON

The Progress Pride flag was developed in 2018 by an American artist and designer, Daniel Quasar. Daniel combined both designs of the Rainbow-Pride flag from 1978 and the Transgender Pride Flag from 1999. The black and brown stripes on the flag symbolize marginalized LGBTQIA+ communities of color and those living with or those who have died from HIV/AIDS. Daniel reshaped the new flag colors into a chevron to represent a need for forward movement

## Black Mourning Ribbon

## A SYMBOL OF REMEMBRANCE AND MOURNING

An accepted patriotic practice and display of mourning is to attach a black ribbon at the top of the American flag for flags displayed on a short staff or for indoor flags that cannot be lowered to half-staff. This ribbon measures 3 " $\times 10^{\prime}$ and is suitable for use with a $3^{\prime} \times 5^{\prime}$ or $4^{\prime} \times 6^{\prime}$ flag. The ribbon is made from the same nylon as our U.S. flags and is finished with a brass grommet for easy attachment to flag.

## Glossary of Standard Terms

Avenue Banner: Banners on brackets that hang from light posts. Generally will always have a sleeve at the top and bottom of the banner.
Back Tack: A reinforcement operation that puts extra stitching on the top and bottom of the fly end. Typically it is no longer than $3 / 4$ to 1 " in length. Standard practice on all fly ends.
Bar Tack: A reinforcement stitch/operation that is performed on WaveBanner ${ }^{\text {rM }}$ only. It always needs to be performed to areas where there is an exposed chain stitch (heading).
Blockout Innerliner: A piece of material used to block the image from the back side showing through to the front side on a double faced product. For flag sizes $6 \times 10$ through $10 \times 15$ '.
Box Tack: A reinforcement operation that is performed to the fly end. This operation is standard on U.S. flags only. This finishing is unique to FlagSource flags.
Burgee: A pennant with a swallow tail ("V" cut) flag used primarily by ships. All burgees are hemmed on 3 sides with a patch cover at the center of the "V" cut.
Chain Stitch: A series of looped stitches that form a chain like pattern. This stitch time allows our stripes to absorb energy when flying outside.
Color Matching: Matching the thread color to the blank that is being sewn. (White material - white thread). This is standard on all sewn products except the Attraction Product line.
Concealed Heading: A type of finishing where heading is sewn on and turned back so that it is not visible. This process requires that a single stitch be run along the bottom of the heading to keep it turned back.
Cut Size: The dimension material is cut before it is sewn.
Double Face: Copy reads correct on both sides (two pieces of material are sewn together).
Double Sided: Copy reads correct on both sides on only one piece of material.
Double Sleeve: Primarily used in conjunction with Avenue Banners. The standard size sleeve is 3 ".
Electronic Heading: A type of finishing that is used specifically for electronic flag poles. This process utilizes webbing material and is finished with the top and bottom edges finished like heading and d-rings, but d-rings are not used.
Finished Size: The dimensions a flag, banner, or other products measure after they are sewn.
Fly End: Four rows of stitching on the outer edge of a flag (away from the flag pole).
Grommet: An eyelet made of brass to strengthen or protect an opening or to insulate or protect something passed through it.
Guidon: a rectangular flag with swallow tail at fly end.
Heading and D-Rings: A type of finishing that is used on FlagSource flags $8 \times 12^{\prime}$ and larger. On flags, $10 \times 15$ ' and larger a \#4 grommet is also inserted.
Heading and Grommets: A type of finishing that is standard on all flags. In general, the heading and grommets are on the left side.
Innerliner: A piece of Tyvek ${ }^{\circledR}$ used to block the image from the back side showing through to the front side on a double faced product.
Leather Tab: A piece of leather that is sewn into sleeves or pole hems that allows a flag to be attached to a pole. Primarily is used with indoor poles. (see Pole Hem Plain)

Lock Stitch: A sewing machine stitch formed by the looping together of two threads one on each side of the material being sewn. A bobbin is inserted into the machine for a bottom thread. This stitch type is used on all outer edge hems.
Paper-Transfer Dye Sublimation: Aqueous ink is embedded into a layer of coating on the transfer paper, which is then applied to polyester fabric with heat and pressure. The ink permanently becomes part of the fabric.
Patch Grommet: A type of finishing where a layer of material is sewn in as a patch and a grommet is inserted. The patch is necessary for a grommet to not pull out of the product.
Pennant: Triangular pieces of fabric primarily used for attracting notice. Hemmed on two sides with heading and 2 grommets or sleeve on the left side.
Pillowcase: A special type of hemming done on certain double sided flags Designs that won't line up edge to edge get pillowcased or if there is an angled or some other special finish to the flag.

Pole Hem Fringe (PHF): A type of finishing that will fit over a pole. It is a sleeve that has a lining sewn in with a leather tab that is sewn in at the top center position. There is also fringe sewn on the outer hems of the flag. The standard size pole hem is 3 ". Spanish Yellow is the standard color for fringe, however, we also offer white and silver.
Pole Hem Plain (PHP): A type of finishing that will fit over a pole. It is a sleeve that has a lining sewn in with a leather tab that is sewn in at the top center position. The standard size pole hem is 3 inches.
Raster Art: An array of square pixels of various colors, which together form an image. When enlarging a raster image, each pixel increases in size and causes the image to become blurry. Quality depends on how many pixels are contained within an inch. The higher number of pixels-per-inch (ppi) the higher the quality. Not a preferred file type.
Reinforced Hem (reinforced grommet): Primarily used on banners and can be used in combination with a small hem. The reinforced grommet will allow a grommet to be affixed to it.
Single Face: Copy reads correct on one side and the reverse side is a mirror image.
Single Sided: Copy is on one side of material and the back side is blank.
Single Sleeve: Primarily used in conjunction with Avenue Banners. Material is folded over once and sewn down. The standard size sleeve is 3 inches.
Six Row Special: Six rows of stitching on the outer edge of a flag.
Sleeve: A type of finishing that will fit over a pole. The standard size sleeve is 3 inches. Sleeves can also be sewn closed at the top (also known as a simple sleeve). Fits 1 " $-11 / 4$ " diameter pole.

Vector Art: Vector graphics are comprised of paths which are defined by a start and end point along with other points, curves and angles. A path can be a line, square, triangle or a curved shape and can be filled with colors. These paths can be used to create simple drawings or complex diagrams. They can be scaled to a larger size and not lose any image quality.
