Welcome to FlagSource

A Customer and Technology Focused Company

Welcome to FlagSource – 2026 is an exciting year of celebrations. This year, we are celebrating 250 years of Independence. It is hard to believe that 250 years have passed. FlagSource is excited to help many households and businesses celebrate our great country's 250th anniversary! Check out all our great 250 products.

FlagSource was founded in 1920, FlagSource is a fourth-generation family-owned business located in Batavia, Illinois. FlagSource is a full-service flag manufacturer who manufactures US Flags, State Flags, Military Flags, International Flags, and their specialty custom flags, banners, table throws, and tradeshow items.

The owners, Spencer and Jennifer Christiansen, are committed to making FlagSource bigger, better, and quicker. Quicker deliveries and higher quality than the competition are FlagSource's secret sauce. Customer Service is paramount at FlagSource. Your needs are our priority. The whole team at FlagSource is in lock step to provide the longest-lasting, best-looking products in our industry.

US Flags are already in high demand in anticipation of our 250th Celebration this year. We are expecting strong sales of our US Flags through October of 2026. If there was ever a year to keep a good supply of US Flags on your shelf, 2026 is the year!

This year, FlagSource is putting in the latest in digital print technology with our new Reggiani Colors Nylon Digital Printer. Our new printer will provide you with near perfect backside penetration on our flags and banners. Coming early March, this new printer will be a game changer.

In late 2025, we switched inks on our Dye Sublimation Printer to DuPont inks. This new ink has not only given us an expanded color gamut, but the light fastness is also a lot longer. FlagSource does Table Throws, Avenue Banners, Wave Banners, Car Flags, Golf Flags, and many more items that you may not be aware of. We invite you to check our catalog to learn more about what we offer.

We look forward to providing you with the highest quality products available!

Glossary of Standard Terms

Avenue Banner: Banners on brackets that hang from light posts. Generally will always have a sleeve at the top and bottom of the banner.

Back Tack: A reinforcement operation that puts extra stitching on the top and bottom of the fly end. Typically it is no longer than 3/4 to 1" in length. Standard practice on all fly ends.

Bar Tack: A reinforcement stitch/operation that is performed on WaveBanner™ only. It always needs to be performed to areas where there is an exposed chain stitch (heading).

Box Tack: A reinforcement operation that is performed to the fly end. This operation is standard on U.S. flags only. This finishing is unique to FlagSource flags.

Burgee: A pennant with a swallow tail ("V" cut) flag used primarily by ships. All burgees are hemmed on 3 sides with a patch cover at the center of the "V" cut.

Chain Stitch: A series of looped stitches that form a chain like pattern. This stitch time allows our stripes to absorb energy when flying outside.

Color Matching: Matching the thread color to the blank that is being sewn. (White material - white thread). This is standard on all sewn products except the Attraction Product line.

Concealed Heading: A type of finishing where heading is sewn on and turned back so that it is not visible. This process requires that a single stitch be run along the bottom of the heading to keep it turned back.

Cut Size: The dimension material is cut before it is sewn.

Double Face: Copy reads correct on both sides (two pieces of material are sewn together).

Double Sided: Copy reads correct on both sides on only one piece of material.

Double Sleeve: Primarily used in conjunction with Avenue Banners. The standard size sleeve is 3".

Electronic Heading: A type of finishing that is used specifically for electronic flag poles. This process utilizes webbing material and is finished with the top and bottom edges finished like heading and d-rings, but d-rings are not used.

Finished Size: The dimensions a flag, banner, or other products measure after they are sewn.

Fly End: Four rows of stitching on the outer edge of a flag (away from the flag pole).

Grommet: An eyelet made of brass to strengthen or protect an opening or to insulate or protect something passed through it.

Guidon: a rectangular flag with swallow tail at fly end.

Heading and D-Rings: A type of finishing that is used on FlagSource flags 8x12' and larger. On flags, 10x15' and larger a #4 grommet is also inserted.

Heading and Grommets: A type of finishing that is standard on all flags. In general, the heading and grommets are on the left side.

Innerliner: A piece of Tyvek® used to block the image from the back side showing through to the front side on a double faced product.

Leather Tab: A piece of leather that is sewn into sleeves or pole hems that allows a flag to be attached to a pole. Primarily is used with indoor poles. (see Pole Hem Plain)

Lock Stitch: A sewing machine stitch formed by the looping together of two threads one on each side of the material being sewn. A bobbin is inserted into the machine for a bottom thread. This stitch type is used on all outer edge hems.

Paper-Transfer Dye Sublimation: Aqueous ink is embedded into a layer of coating on the transfer paper, which is then applied to polyester fabric with heat and pressure. The ink permanently becomes part of the fabric.

Patch Grommet: A type of finishing where a layer of material is sewn in as a patch and a grommet is inserted. The patch is necessary for a grommet to not pull out of the product.

Pennant: Triangular pieces of fabric primarily used for attracting notice. Hemmed on two sides with heading and 2 grommets or sleeve on the left side.

Pillowcase: A special type of hemming done on certain double sided flags. Designs that won't line up edge to edge get pillowcased or if there is an angled or some other special finish to the flag.

Pole Hem Fringe (PHF): A type of finishing that will fit over a pole. It is a sleeve that has a lining sewn in with a leather tab that is sewn in at the top center position. There is also fringe sewn on the outer hems of the flag. The standard size pole hem is 3". Spanish Yellow is the standard color for fringe, however, we also offer white and silver.

Pole Hem Plain (PHP): A type of finishing that will fit over a pole. It is a sleeve that has a lining sewn in with a leather tab that is sewn in at the top center position. The standard size pole hem is 3 inches.

Raster Art: An array of square pixels of various colors, which together form an image. When enlarging a raster image, each pixel increases in size and causes the image to become blurry. Quality depends on how many pixels are contained within an inch. The higher number of pixels-per-inch (ppi) the higher the quality. Not a preferred file type.

Reinforced Hem (reinforced grommet): Primarily used on banners and can be used in combination with a small hem. The reinforced grommet will allow a grommet to be affixed to it.

Single Face: Copy reads correct on one side and the reverse side is a mirror image.

Single Sided: Copy is on one side of material and the back side is blank.

Single Sleeve: Primarily used in conjunction with Avenue Banners. Material is folded over once and sewn down. The standard size sleeve is 3 inches.

Six Row Special: Six rows of stitching on the outer edge of a flag.

Sleeve: A type of finishing that will fit over a pole. The standard size sleeve is 3 inches. Sleeves can also be sewn closed at the top (also known as a simple sleeve). Fits 1"-1¼" diameter pole.

Starfield: Material with stars either embroidered or sewn on.

Vector Art: Vector graphics are comprised of paths which are defined by a start and end point along with other points, curves and angles. A path can be a line, square, triangle or a curved shape and can be filled with colors. These paths can be used to create simple drawings or complex diagrams. They can be scaled to a larger size and not lose any image quality.
